AUTHOR INDEX TO VOLUME 12

Abbs, Mary H. See Karlovich, R.S. 67-70
Arbeit, W. R. See Herman, L.M. 109-120
Antinoro, F. See Skinner, P.H. 26-35
Arkebauer, H.J. See Menscher, G.T. 340-343
Aston, C.H. Hearing-impaired children's discrimination of filtered speech 162-167
Beasley, D.S., Forman, Bonnie J. and Rintelmann, W.F. Perception of time-compressed CNC monosyllables by normal listeners 71-75
Belter, R.C. and Rupp, R.R. Standard audiometric procedures for thresholds above 8 kc/s: a normative study 199-202
Bell, R.W. (See Zachman, T.A. 137-145
Bothe, Susan J. and Elfner, L.F. Monaural vs binaural auditory localization for noise bursts in the median vertical plane 291-296
Brown, W.S., Jr. and Brandt 157-161
Brandt, J.F. See Brown, W.S., Jr. 157-161
Brown, D.J. See Martz, R. 146-148
Brown, W.S., Jr. and Brandt, J.F. The effect of masking on vocal intensity during vocal and whispered speech 157-161
Cain, C.J. See Lass, N.J. 308-312
Carhart, R. See Vargo, S.W. 276-278
Chambers, A.H. See McNall, C.L. 1-7
Conn, Marjorie, Ventry, I.M. and Woods, R.W. Pure-tone average and spondee threshol relationships in simulated hearing loss 234-239
Copeland, A.B. and Pace, Susan A. Bekesy audiometric thresholds for the Telephonics TDH-39 earphone 244-246
Cox, W. See Gatehouse, R.W. 179-183
Crane, H.D. A computer-generated display of cochlear traveling waves 36-52
Crowley, D. E. Comments on otitis media in rats 125-128
Egan, J.J. Psychoacoustics of the Lombard voice response 318-324
Elberling, C. See Pedersen, C.B. 279-284
Elfner, L.F. See Bothe, S.J. 291-296
Elfner, L.F. See Kornburger, R.A. 325-330
Farley, F.H. and Gundrum, Ruth A. Arousal, personality and pitch discrimination 285-290
Forman, B.S. See Beasley, D.S. 71-75
Fornay, R.B. See Martz, R. 146-148
Gaeth, J.H. See Robinette, M.S. 91-100
Gatehouse, R.W. and Cox, W. Localization of sound by completely monaural deaf subjects 179-183
Gatehouse, R.W. and Oesterreich, R.E. The roles of the pinna and the external auditory meatus in monaural sound localization 83-90
Goetzinger, C.P. See Marston, L.E. 302-307
Goldberg, H. The Utopian Hearing Aid: Current state of the art 331-335
Greenberg, H.J. See Ratliffe, S.S. 14-25
Gundrum, R.A. See Farley, F.H. 285-290
Harbert, F., Paris, Deanne, and Wenner, C. Factors affecting the loudness discrimination of suprathreshold signals increasing or decreasing in intensity 149-156
Herman, L.M. and Arbeit, W.R. Frequency difference limens in the bottlenose dolphin: 1 - 70 Kc/s 109-120
Hicks, R.G. Processing of non-symbolic auditory information 228-233
Hodgson, W.R. and Sung, R.J. Comparative performance of hearing aid microphone and induction coil for a sentence intelligibility test 261-264
Holding, D., Loeb, M. and Yoder, D. "Masking" vs interference in pitch perception 247-254
Irvin, B. See Zachman, T.A. 137-145
Johns, D.F. See Roeser, R.J. 184-186
Karlovich, R.S., Abbs, M.H. and Luterman, B.F. Influence of the acoustic reflex on TTS from 1 and 4 kc/s continuous pure tones 67-70
Kiplinger, G.F. See Martz, R. 146-148
Kornburger, R.A. and Elfner, L.F. The role of pitch sensation in the monaural localization of white noise 325-330
Kuper, Eolin C. Speech training through musical ear-training for pitch-deficient children having articulatory defects 168-172
Lass, N.J. and Cain, C.J. A correlational study of listening rate preferences and listeners' oral reading rates 308-312
